Bilateral Meetings

- Thursday 15:00 - 18:00

Description

We are a technology-based company that works in IOT + Big Data, managing the information through our own sensorization platform. With several years of experience and installations in operation, we develop customized solutions adapted to the needs of our customers, which include from the installation and programming of data acquisition equipment, through the choice of sensors or the development of management platforms, visualization and interpretation of the data obtained.
